

Article 10 H

Maintenance Instructor Upgrade Plan

In preparation for upgrading to teach a new class, or to teach a class that has not been taught for an extended period of time, the Maintenance Instructor's Supervisor shall, after consultation with the Maintenance Instructor, the course principal, **System Committee Chair** and the Department Manager, determine whether an upgrade plan is appropriate and the timeframe within which the upgrade plan must be completed. **An Instructor will not be scheduled to teach an entire course they are currently upgrading on until the upgrade plan is completed, unless it's part of the upgrade plan. Agreement by the Maintenance Instructor to be upgraded to teach more than one fleet/course is required.**
